

Bijlage 5: ILAE 2022 Classificatie van epilepsie syndromen

	Focaal	Focaal en/of gegeneraliseerd	Gegeneraliseerd	Ontwikkelings- en/of epileptische encephalopathie of syndromen met progressieve neurologische deterioratie
Debut op neonatale leeftijd of vroege kinderleeftijd (<24 maanden)	Self-limited (familial) neonatal epilepsy (SeLNE) Self-limited (familial) infantile epilepsy (SeLIE) Self-limited familial neonatal-infantile epilepsy (SeLFNIE)	Genetic epilepsy with febrile seizures plus (GEFS+)	Myoclonic epilepsy in infancy (MEI)	Early infantile DEE (EIDEE) Epilepsy of infancy with migrating focal seizures (EIMFS) Infantile epileptic spasms syndrome (IESS) Dravet syndrome (DS) Etiologie-specifieke DEE's KCNQ2-DEE Pyridoxine-dependent and pyridox(am)ine 5' phosphate deficiency DEE (PD-DEE / P5PD-DEE) CDKL5-DEE PCDH19 clustering epilepsy GLUT1DS-DEE (GLUT1DS) Sturge-Weber syndrome Gelastic seizures with HH (GS-HH)
Debut op kinderleeftijd	Self-limited focal epilepsies Self-limited epilepsy with centrotemporal spikes (SeLECTS) Self-limited epilepsy with autonomic seizures (SeLEAS) Childhood occipital visual epilepsy (COVE) Photosensitive occipital lobe epilepsy (POLE)		Epilepsy with myoclonic absences (EMA) Epilepsy with eyelid myoclonia (EEM)	Epilepsy with myoclonic-atonic seizures (EMAtS) Lennox-Gastaut syndrome (LGS) DEE of EE with spike-and-wave activation in sleep (DEE-SWAS / EE-SWAS) Febrile infection-related epilepsy syndrome (FIRES) Hemiconvulsion-hemiplegia-epilepsy (HHE)

Debuut op variabele leeftijd	<u>Mesial temporal lobe epilepsy with hippocampal sclerosis (MTLE-HS)</u> <u>Familial mesial temporal lobe epilepsy (FMTLE)</u> <u>Sleep-related hypermotor (hyperkinetic) epilepsy (SHE)</u> <u>Familial focal epilepsy with variable foci (FFEVF)</u> <u>Epilepsy with auditory features (EAF)</u>	<u>Epilepsy with reading-induced seizures (EwRIS)</u>		<u>Rasmussen syndrome (RS)</u> <u>Progressive myoclonus epilepsies (PME)</u>
Idiopathisch gegeneraliseerde epilepsie (als onderdeel van genetische gegeneraliseerde epilepsieën)			<u>Epilepsy with generalized tonic-clonic seizures alone (GTCA)</u> <u>Childhood absence epilepsy (CAE)</u> <u>Juvenile absence epilepsy (JAE)</u> <u>Juvenile myoclonic epilepsy (JME)</u>
